Karmayogi Competency Model (KCM)

India's first indigenous Public Sector Human Resource Management framework tailored for building a capable, accountable, and citizen-centric civil service.

[Karmayogi Competency Model \(Download Here\)](#)

Vision

The Karmayogi Competency Model signifies **Atmanirbharta (self-reliance)** in Competency-Based Capacity Building, reinforcing the commitment to develop a capable, accountable, and citizen-focused civil service. The model is inspired by Indic wisdom and advances the tenets of Mission Karmayogi.

- ✓ The KCM will define the required competencies for capacity-building curricula.

CAPACITY
BUILDING
COMMISSION

- ✓ Officers will be shown courses based on the specific competencies they need to develop.

Objectives

The Karmayogi Competency Framework seeks to align roles with the competencies required to perform them effectively across all learning content within the Government of India. By embedding competencies directly into training and capacity-building exercises, the framework aims to shift Ministries, Departments, and Organisations (MDOs) from a rule-based approach to a more comprehensive, role-based way of thinking. This transition ensures that capacity-building initiatives are not viewed merely as compliance exercises but as structured pathways to strengthen the ability of civil servants to deliver on their responsibilities.

The integration of the KCM will help establish a common language for identifying, developing, managing, and deploying talent across the government ecosystem. It will enable MDOs to clearly define the competencies associated with each role, track workforce performance against those competencies, and set concrete targets for

not only enhance the efficiency and effectiveness of the government workforce but also improve role-fit, build accountability into learning and performance, and foster a culture of continuous development.

Conceptual Framework

“The Karmayogi Competency Model (KCM) is India's first indigenous Public Sector Human Resource Management framework. Rooted in India's cultural and administrative context, it defines the values, skills, and behaviors required to build a capable, accountable, and citizen-centric civil service. Unlike one-size-fits-all global models, KCM is tailored to India's governance challenges, aligning with the aspirations of a Viksit Bharat (Developed India).

Global Benchmarking

Serving citizens with dedication

The Competency Framework

KCM categorizes competencies into two key domains:

13

Behavioural Competencies

5 Leadership + 8 Core

Observable traits and actions that define effective public service. Including: Self-Awareness, Solution Orientation, Service Orientation, Creativity & Innovation, Strategic & Collaborative Leadership.

CAPACITY
BUILDING
COMMISSION

21

Functional Competencies

Skills & Tools

Skills and tools essential for governance and service delivery. Including: Policy Architecture, Project Management, Financial Management, Digital Fluency & Data Analytics, Grievance Redressal, Vigilance & Change Management.

Alignment with Mission Karmayogi

The KCM directly supports the five objectives of Mission Karmayogi:

- ✓ Enhancing performance
- ✓ Citizen-centric governance
- ✓ Future readiness
- ✓ Accountability in service

CAPACITY

and personalized learning for civil servants.

A Transformative Shift

The Karmayogi Competency Model marks a paradigm shift in India's governance philosophy:

- ➔ From rule-based to role-based governance
- ➔ From Karmachari (employee) to Karmayogi (dedicated worker)
- ➔ From traditional administration to workplace transformation

Significance

KCM embodies Atmanirbharta (self-reliance) in competency-based capacity building. By defining what public officials need to know, do, and embody, it strengthens India's commitment to building a future-ready, citizen-focused, and accountable civil service.

Key Milestones

Integration of KCM with the iGOT Platform

The KCM has already been integrated within the iGOT platform for all courses, webinars, events, etc. This will enable a competency-based approach to learning.

A course on KCM is available on the iGOT platform
